Project Design Phase - I
Proposed Solution Template

Date	23 sept 2022
Team ID	PNT2022TMID40252
Project Name	University Admit Eligibility Predictor

Proposed Solution Template:

S.NO	PARAMETER	DESCRIPTION
1.	Problem statement	To predicit the universities for the students to who is going to higher studies.
2.	Idea/Solution description	It will help the students to get admission for under graduate degrees from the top universities and well infrastructure laboratories.This analysis is helpful who is unaware of choosing UG degrees after secondary education.It will predict the students admission to the respected universities based on their secondary education marks.
3.	Novelty/Uniqueness	This website has to predict the universities inside India And also give various information about the universities.Also list the universities in the ranking list.
4.	Social Impact/Customer satisfaction	This website reduce the panic and unawareness among the students.It will reduce our time,travel and cost.It will give the exact approximate prediction based on students secondary education marks.
5.	Business Model(Revenue Model)	Universities shall find the website inorder to maintain it.This website will predict and display the exact results to the students.
6.	Scalability of the Solution	A future update shall have chat space comprising faculty,current students and alumini.It can be scaled for universities all around the world.
